

CLOUD BACK UP

SCHOOL DATA, FULLY PROTECTED

Tape backup is outdated, unreliable and work intensive. Cloud backup solutions now form the gold standard for protecting sensitive data.

WE SET EVERYTHING UP FOR YOU

Unlike self-service remote backup and storage, we provide a fully managed service and set everything up for you. It's not only one less job for you to think about, but also extra peace of mind when you've got an expert setting it up for you.

CAPITA APPROVED BACKUP FOR SIMS & FMS

Not all remote backup solutions are the same. As specialists in IT for primary schools, we offer backup services which are Capita approved for SIMS and FMS data.

ENCRYPTED DATA

Before your data leaves your school, we encrypt it using high level AES encryption standards.

AUTOMATIC BACKUP

The beauty of cloud backup is that it happens automatically, usually overnight so it doesn't chew up bandwidth or slow your internet connection.

CAREFULLY MONITORED

We don't just set it and forget it. We monitor your cloud storage constantly to ensure that everything is running exactly as it should.

DISASTER RECOVERY

You may well never have a disaster which destroys your data on-site. But if it were to happen, you'd want to know that your most valuable data is safe. Should you ever need it, we offer disaster recovery as an additional service to cloud backup.

FIND OUT MORE

Ditch unreliable tapes and no frills cloud storage solutions. When your data matters to you, give it the safety and protection it deserves. Call us today. You might be surprised at just how little it costs to have a fully managed cloud solution. **Call us on 0118 936 0080 today and we'll be happy to answer your questions.**
